On offer: track hire for training and the organization of competitions (karting, supermoto, motorway On weekdays the track area is available for: walkers, cyclists, moto-cyclists, Nordio valkers, skateboarders and skiers.

🗱 WINTER RECREATION

- Madona and its surroundings is one of the most popular Latvian winter recreation areas, we even call **Madona the Latvian winter capital.** This is supported by the hilly terrain and stability of natural snow cover, and well equipped ski resorts, where international competitions take place. In winter the snow cover is on average 20 cm thicker and winter lasts for a month longer than elsewhere in Latvia.
- Skiing traditions have also a noteworthy history: national cross-country ski competitions were organized in Madona already in the 1930s, while since 1961 cross-country skiing and biathlon are included in Madona Children and Youth Sport School program.
- The sports school has brought up participants of Winter Olympics in cross-country skiing and biathlon (R. Raimo, G. Upenieks, R. Zīmelis). In more recent history we can be proud of World Cup 2006 and 2013 competitions in
- ski orienteering sport and Scandinavian Cup in cross-country skiing that is taking place in "Smeceres Sils" Winter Sports Centre 2011-2014.

KALA LAKE (407 ha) its islands, inlets and the hilly shore make it one of the most beautiful Latvian lakes. The lake and its shore is a popular angling and recreation place. Its managers, the company (Board of Kala Lake), work regulary at the resource recovery so anglers have a good chance to catch zanders, pikes and other fishes.
 Boats, angler's licences, (available also at www.epakalpojumi.lv),
 Pedalos, recreation places etc. 13 14 31
 Image: Image:

Madonas novads. The program includes the visiting of three tourism households around the lake: Kālezers recreation place, Bērzi, wehre you can taste non-traditional jams, tea and infusions, lelāpi – making of parfumed soap. There are also available lunches. You can go there by car or cross the lake by pedalo. 8 pedalos available, the map and guide services.

THE SHORE OF LAKE LUBĀNS. The largest Latvian lake (80.7 km²) is surrounded by Lubāns wetland (51,632 ha). The area of the lake is a unique landscape with reeds, the shore dam, scrubs and grassland, dams, canals and locks. The lake and the area is popular for bird watching, fishing and active recreation.

BIRD-WATCHING. About 220 species of birds can be observed around the lake, including some globally threatened ones; the area has been marked as one of the best nesting sites of 29 European specially protected bird species. Bird watching is possible from the six observation towers, a telescope and binoculars are available at the tourist information centre.

8 LUBANS WETLAND TOURISM INFORMATION CENTRE Aiviekstes hidromezgls, Ošupes pagasts, Madonas novads

GPS: 56.8164; 26.9065] +371 29234956, infolubans@inbox.lv
